The Digital Media Commons

Vision

The Digital Media Commons in Jackson Library supports 21st-century thinking and learning at UNCG by providing the space, technology, resources, and services to support the digital creation and communication of projects and ideas, from concept to final production and presentation.

Mission

- Provides unique space, resources, services and technology to support digital creation and communication of projects and ideas, from concept to final production and presentation.
- Supports the UNCG curriculum goals in information and media literacy and communication skills.
- Provides a dynamic learning experience through the combination and interaction of innovative technology and highly trained consultants.

Goals

- Provides the technology, tools, and expertise to assist UNCG students, faculty, and staff in developing media for their instructional and professional needs.
- Provides technology, tools, and expertise to assist UNCG students, faculty, and staff to communicate their media to their audience.
- Provides the space and technology to practice presentations using media in a group setting.
- Provides the space and technology to screen and edit films and other media.
- Provides a variety of collaborative and individual learning spaces.
